

Opti•San IIITM Antiseptic Hand Wash

Opti-San IIITM Antiseptic Hand Wash

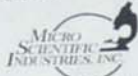

Directions for Use: To decrease bacteria on skin. Ready to use.
For use by health care personnel in between patient contact to reduce the incidence of nosocomial infections.

Health Care Personnel Hand Wash:
1. Wet skin and spread a small amount (5 ml) to hands
2. Scrub well and rinse thoroughly and dry.
For external use only.

CAUTION: In the unlikely event the skin shows signs of irritation or sensitivity, discontinue use. Avoid contact with eyes. In case of eye contact, flush with plenty of water.

Active Ingredients: 0.3% triclosan (w/v)

Re Order No. OS10-1000 1000 ml (33.8 fl. Oz.)

Rolling Meadows, IL 60008 USA

Opti-San III™

Antiseptic Hand Wash

NDC # 63631-220-12

Description: Opti-San III is intended to clean and decrease bacteria on hands and skin. Medicated with 0.3% triclosan, this unique product contains skin softeners and other skin protective agents. Its emolliated formula is gentle to skin that eliminates the need for potentially contaminated hand and skin lotions.

Efficacy: Opti-San III formulation combines 0.3% triclosan, with a number of other supportive ingredients that work in synergy to produce bactericidal results on skin unsurpassed by similar products. Independent tests produced bacterial reductions on skin using Opti-San III that were only matched by 2% and 4% CHG products. This is truly a unique product.

Safety: Non-flammable and Non-caustic, Opti-San III requires no special handling or storage. It is provided in leak proof bag containers and will not stain sinks, walls, floors or attire.
